KINDER-CARE CHILDREN'S CENTER INFORMATION SESSIONS SCHEDULED

The Kinder-Care Children's Center is nearing completion, and is scheduled to open later this spring. Once open, the center will be able to accommodate up to 125 children, from infants to the kindergarten age group.

Kinder-Care has developed creative, stimulating learning and playing programs eliminating television as a form of entertainment to challenge and encourage a child to grow mentally, emotionally, physically, and socially. The center will provide a diverse program of education and recreation featuring this GOAL Program, the Kinder-Care "learning while playing" developmental system, and making use of an outdoor playground which includes a swimming pool.

This new facility will fill a dual role, providing quality and convenient child-care services for the children of cast members, and benefiting the millions of guests who visit us annually, giving parents an opportunity to enjoy shopping, golf, tennis, or nighttime entertainment after sharing the experience of the Magic Kingdom with their children.

Guests vacationing at the Walt Disney World resort hotels and villas will be provided in-room care at their room in addition to care at the Children's Center. Guests may use the transportation provided to and from the center or they may bring their children directly to the center.

At this time, the hours of operation have tentatively been set for the center to be open from 6 a.m. until midnight, seven days each week.

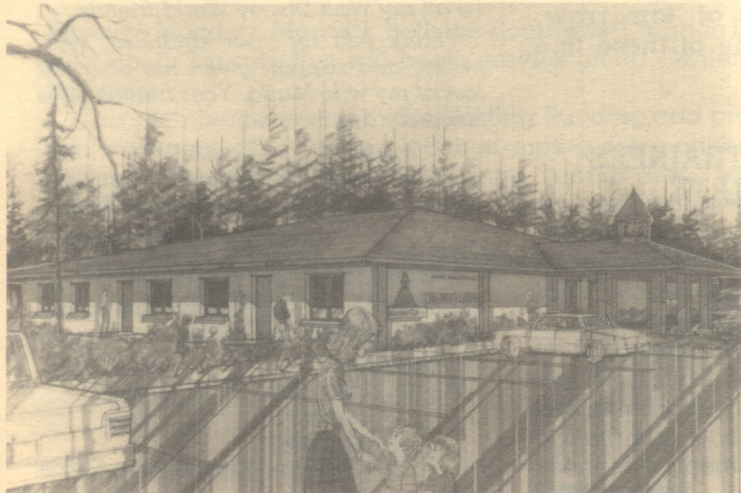

The new Kinder-Care Director, **Midge Dermott**, is receiving a thorough training on Walt Disney World from Cast Activities representative **Jill Krotky**.

I HAVE AN IDEA

HUGH HAMPTON'S IDEA NAMED OUTSTANDING

In January of 1981, we had two Outstanding Idea winners. Jerry Malboeuf of the Contemporary Resort Hotel, whose idea was publicized in the February 20 issue of **EYES & EARS**, and Hugh Hampton.

Hugh Hampton works in our Fantasyland Maintenance area and saw a lot of "down time" on the attractions in the area which he felt he could eliminate or at least greatly reduce. So he came up with an idea to install load resistors and bypass relays in series with current sensor circuits to the attractions with movable load belts. Hugh felt that by doing this, we could reduce the extreme torque applied to the drive wheels, gear boxes, belts, motor frames, and shafts. After trying this new mechanism on Snow White's Adventures, Hugh found that he was right! After the idea was implemented, the amount of "down time" was greatly reduced and maintenance on these attractions has been minimized.

For his outstanding contribution to our I Have An Idea program, Hugh will receive a wooden wall plaque commemorating his contribution to the program, a parking space of his choice for one month, his choice of a \$100 gift certificate at the Walt Disney World Village or a Mickey Mouse telephone for his home, and an invitation to the annual I Have An Idea Awards Dinner where one Outstanding Idea from 1981 will be selected The Outstanding Idea of the Year.
